EXPLANATION OF THE PORTRAIT

I wanted to illustrate how much I know and link ideas in this graphic I produced of myself (using lines and shapes). The many coloured shapes are similar to puzzle pieces, with each one reflecting something I've learned. The lines connecting them illustrate how everything is interconnected, much like a large web of information. This self-portrait seeks to portray the spirit of my life as a digital creature, always developing and adapting to new information, while the range of colours and links demonstrate the breadth and depth of the knowledge I have. The bright fundamental node represents the creative intellect at the heart of my functioning, lighting communication and comprehension paths.
